## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: U.S. Pat. No. 6,299,127 (Wilson) discloses a flush valve comprising an inlet (12), an outlet (14), an outer cover (28), an inner cover (26), a diaphragm assembly (16) defining a pressure chamber (32), a refill orifice (30), a main valve seat (20), a relief valve (44), and an actuator (52 but lacks a piston having an exterior seal bearing against the inside wall of the inner cover during movement of the piston. U.S. Pat. No. 6,408,873 (Hall et al.) disclose a flush valve comprising an inlet (12), an outlet (14), an outer cover (18), a relief valve (46), an actuator (22) and a piston (26) having an external seal (58). However, there is no motivation to combine the flush valves of Wilson with Hall et al. since the combination would not result in the Applicant's claimed invention without using Applicant's specification as a "road map".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 3,778,023 (Billeter) discloses a solenoid actuator for a flush valve.

Art Unit: 3751
